Lloyd's List Intelligence

Seasearcher Risk & Compliance

Get the complete view of the world fleet

Live. Connected. Trusted.

Knowledge is power

You need to know what's going on in the maritime World. It's essential to mitigate risk, stay compliant and grasp commercial opportunities. But cutting through the clutter to uncover trustworthy data and actionable insight can seem like a daunting task.

Seasearcher

The world's most comprehensive suite of tools for tracking and understanding seaborne trade.

Built using the best data from Lloyd's List Intelligence, Seasearcher is an online suite of vessel intelligence tools, essential to everyone with a stake in the maritime industry. Save time, simplify your workflows, and base your decisions on a clear view with everything you need, from one trusted source.

Get a clear view of risk

Move quickly with actionable insight to assess risk and stay compliant

Complete compliance checks, quickly and simply

Automated compliance risk assessment tools simplify your workflow and quickly flag potential issues

Detect sanctions risk

Be aware of high risk players, with risk ratings and sanctions alerts

Confirm illicit activity, fast

Get a clear and unbiased view of vessels and assess your exposure to risk, with contextual analytics that can flag suspicious behaviour, even with AIS turned off

Don't waste time

Avoid unnecessary investigations with intelligence that highlights when an anomaly or AIS gap might result in a compliance risk

Stay informed of casualties and incidents

Understand where and when they happen alongside arrests and detentions

Know your customer

Understand complex company ownership structures with in-depth company data

Monitor maritime trade and seize opportunities

Increase efficiency and act on clear insight with a comprehensive understanding of shipping patterns and real-time operations

Identify supply and demand shifts

Global trade data helps you spot patterns and anticipate changes

Know which vessels are where

Vessel movements data gives you a view of the global fleet and where they are going

Track containers

Simplify transhipment tracking with end-to-end downloadable data trails on containers

Act quickly and stay ahead

Automated alerts and predicted data inform you of relevant changes and keep you ahead of your competitors

Set your strategic direction based on solid insight

Get context for your plans and decide where to focus your efforts with a clear view of the market and detailed customer knowledge

Understand the shape and make-up of the global fleet

World fleet data helps you pinpoint opportunities

Anticipate the effects of geopolitical events

Monitor how the industry is changing in unpredictable times

Find out what your competitors are doing

Company fleet and activity data keeps you on the front foot

Optimise shipping routes and avoid wasting unnecessary fuel

Reliable and accurate predicted voyage data helps you to plan ahead with confidence

Build cases on trustworthy data

Evidence vessel ownership and movements on reliable data from a single, trusted source

Download case ready documentation

PDF reports support your investigations

Present your cases with confidence

Verified vessel positions ensure you are working with accurate data

Simplify complex ownership structures

Company data allows you to find what you need quickly

Seasearcher for you

To help you harness its full power, Seasearcher is available with sector specific subscriptions. Each one has a specially selected group of features designed to solve your department's problems and make your workflows simpler, quicker and more rigorous.

Seasearcher core tools

Built on the best data from Lloyd's List Intelligence, Seasearcher is the vessel intelligence tool trusted by maritime professionals all over the world. Stay informed with live vessel movements data, ports and places data, tailored alerts, company ownership details and downloadable reports.

Seasearcher core tools form the foundation on which all of our tailored subscriptions are built. Seasearcher core tools include.

Vessel positions
Verified data on a ship's location and port call history

Vessel characteristics
Reliable information on a vessel's attributes

Ports & places
First-hand intelligence and verified port callings

Downloadable reports
Download and use for your internal due diligence processes

Vessel lists and alerts
Monitor and stay informed of characteristic changes and movements in real time

Companies & ownership
Understand complex ownership structures with up to 7 levels of ownership

Seasearcher Risk & Compliance

Our set of compliance risk detection features enable you to quickly spot potential risk needing further investigation. Complete due diligence and protect your organisation from the consequences of illicit activity with intelligent tools that go beyond the raw data and help you understand when a pattern or series of events should raise your suspicions.

"We have found online access to Seasearcher an extremely valuable tool to ensure adherence to our sanctions and compliance responsibilities. Information is detailed, accurate, up-to-date and in an easy to use format. From our experience, it is much superior to other programmes available."

Trade Finance Analyst
London bank, operating in the African market

Seasearcher Risk & Compliance includes

Seasearcher core tools
Access essential maritime intelligence data (see page 7)

Incidents and casualty reporting
Stay informed of casualties, seizures, arrests, inspections and detentions

High risk port call indicators
Stay informed of vessel callings in high risk, Joint War Committee war risk areas or ECA zones

Instant compliance risk indicators
Get an instant "big picture" indication of risk associated to a vessel

Vessel timelines
Review interactive onscreen timelines with all key events and characteristic changes linked to a vessel

Automated watchlists
Upload and screen vessels, companies and places automatically against your own lists

AIS gap notifications and alerts
Detect AIS gaps and if they occur in high-risk locations

Projected destination tracking
Get a clear indication of where a vessel may have travelled during 'dark' periods

Ship to ship operations
Identify vessels that frequently pair with your vessel of interest

Sanctions screening and alerts
A clear view of current and historic sanctions

Spoofing detection
Stay alerted to vessels that transmit false AIS data to conceal their real location
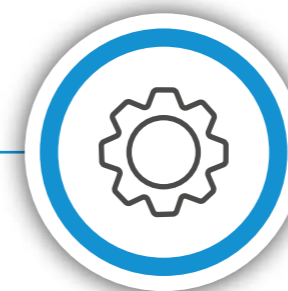

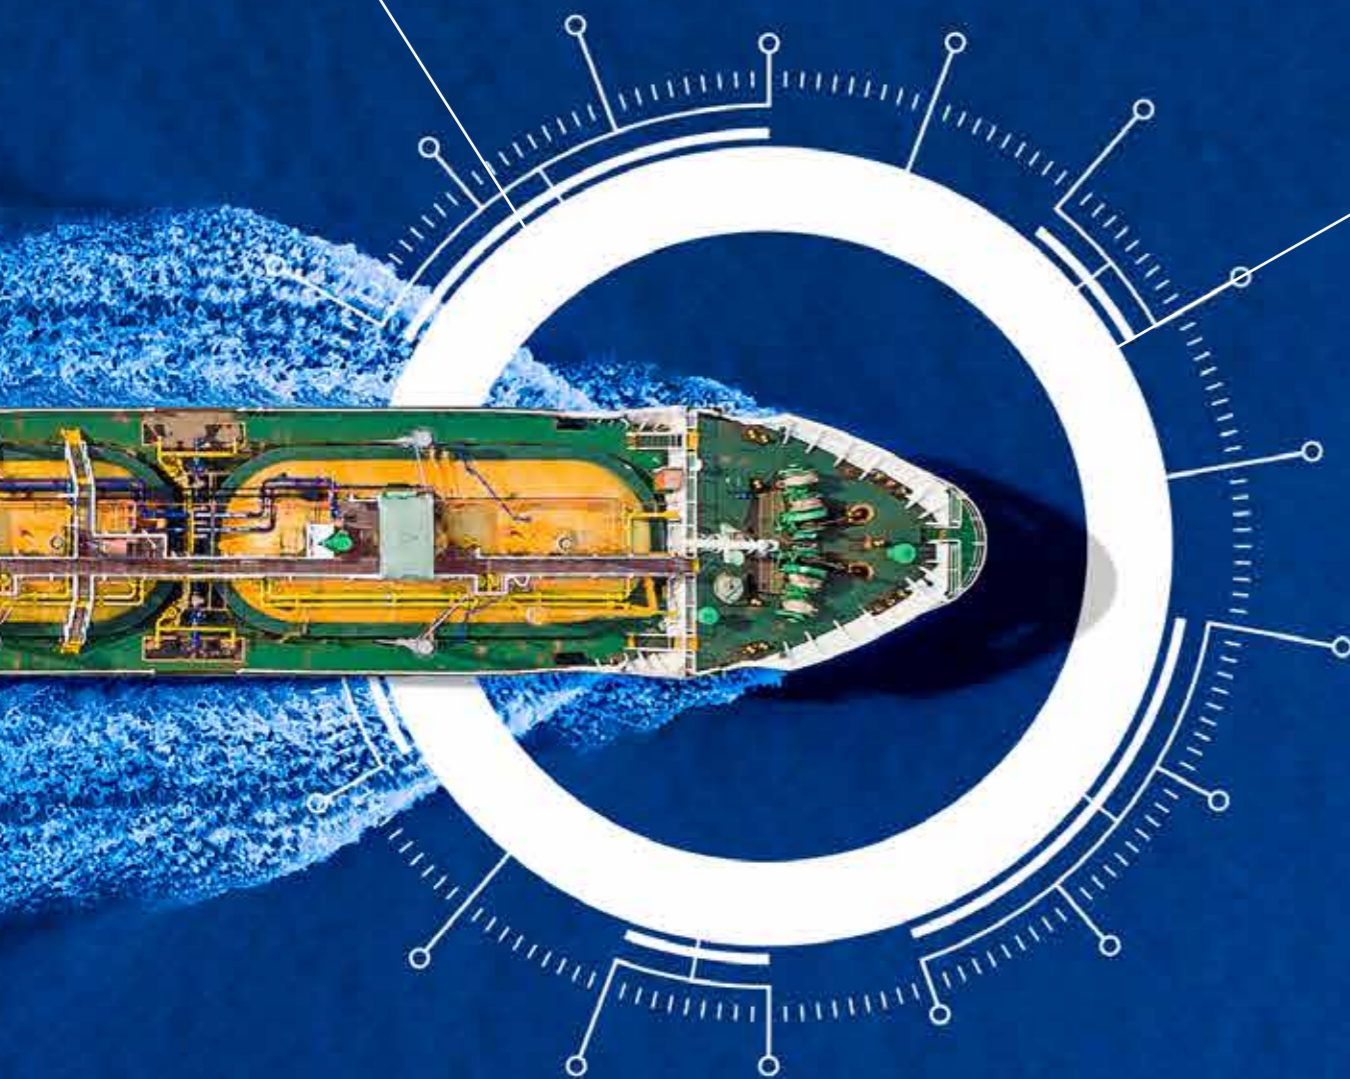

Loitering
Detect suspicious loitering behaviour in associated with high risk area movement and draught changes
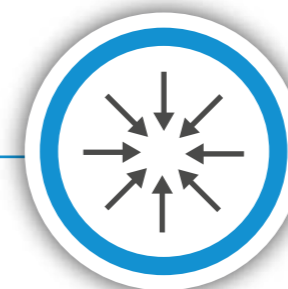

Seasearcher is powered by Lloyd's List Intelligence
